

The CJD Support Group Network (CJDSGN) is a national non profit organisation that provides support, assistance and advocacy for all Australians affected by CJD and other prion diseases.

For patients diagnosed with prion disease (CJD) their carers and family members

The CJDSGN provides information on the various diagnostic tests, what to expect with progression of the disease and care needs.

The CJDSGN can assist families with options for genetic testing to establish or rule out a genetic cause.

The CJDSGN can provide an information package for families.

The CJDSGN provides information on drug development and clinical drug trials.

For health care professionals involved in the care of a suspected CJD patient

The CJDSGN can provide an information package that includes our handbook on patient care.

The CJDSGN can provide advice on progression of the disease and symptom management.

The CJDSGN provides an education and awareness program.
